
College of Information Science Engineering

Automation

What you will learn in this program?

Train students in the broad theoretical foundation and relevant expertise in the fields of control theory and systems, production process automation, computer information technology and applications. Train students to have practical ability and innovative spirit, and can engage in industrial process control, motion control systems, automated instrumentation, engage in system analysis, system design, technology development and research in the fields of computer measurement and control systems, comput-er information processing and applications, system integration, etc.

Courses you'll take

Microcomputer Principles and Application

Motor and Electric Drive Foundation

Computer Control System

Process Detection Instruments

Automatic Control Principle

Regulators and Actuators

Dynamic Control Principle

Process Control Engineering

Teaching languages:
Chinese

Tuition:
25000 RMB/year

Course start date:
September

Course duration:
Four Years

Required qualifications for applicants

1. Non-Chinese citizens, in good health

Applicants should be non-Chinese citizens. In the case of former Chinese citizens, they should have proof of having obtained a foreign citizenship for more than 4 years and with a valid passport.
